

# Teens' Digital World

The use of technological devices  
in education

Yaşar Demir & Muhammed Timurkaan

We made a test in three different methods to 3 different groups consist of 30 students each about the use of technological devices. Each group has 5 minutes.

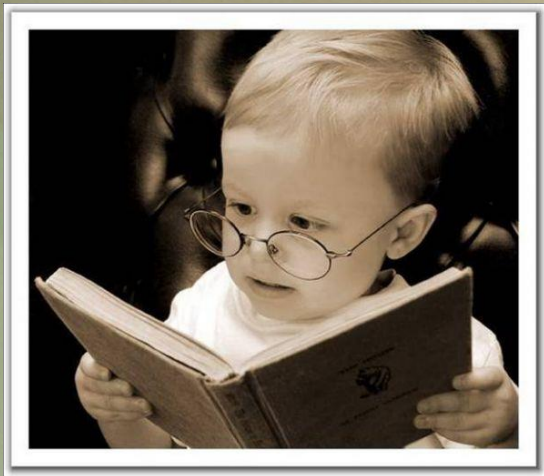

First Group: Only reading from  
the paper

Second Group: only reading from  
the digital screen

Third Group: reading from the  
paper and digital screen

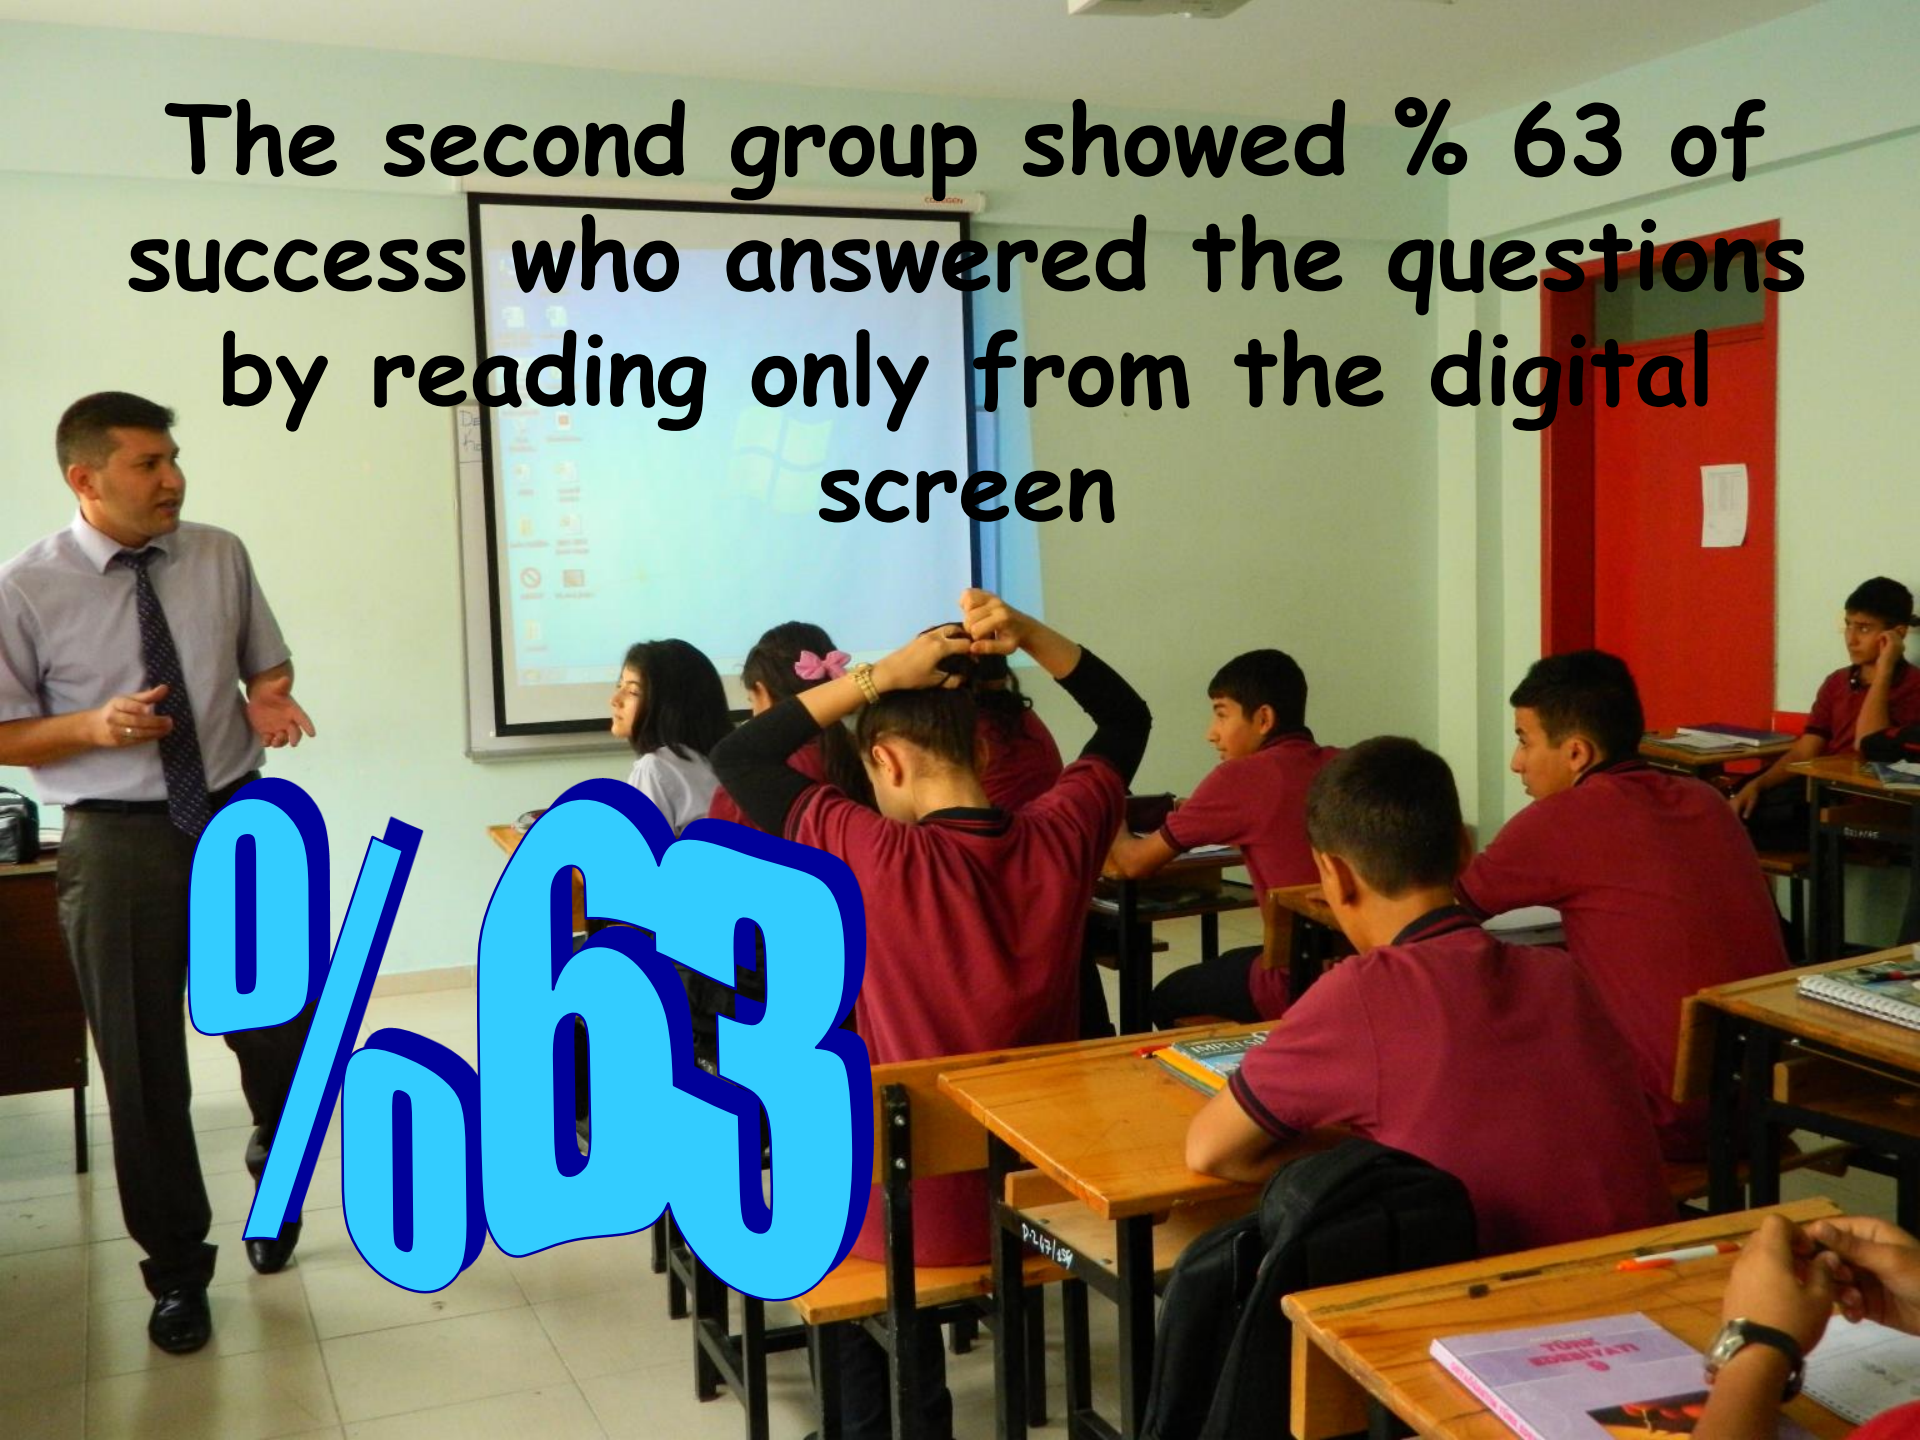

The first group showed  
% 55 of success who  
answered the questions by  
reading only from the  
papers

The second group showed % 63 of success who answered the questions by reading only from the digital screen

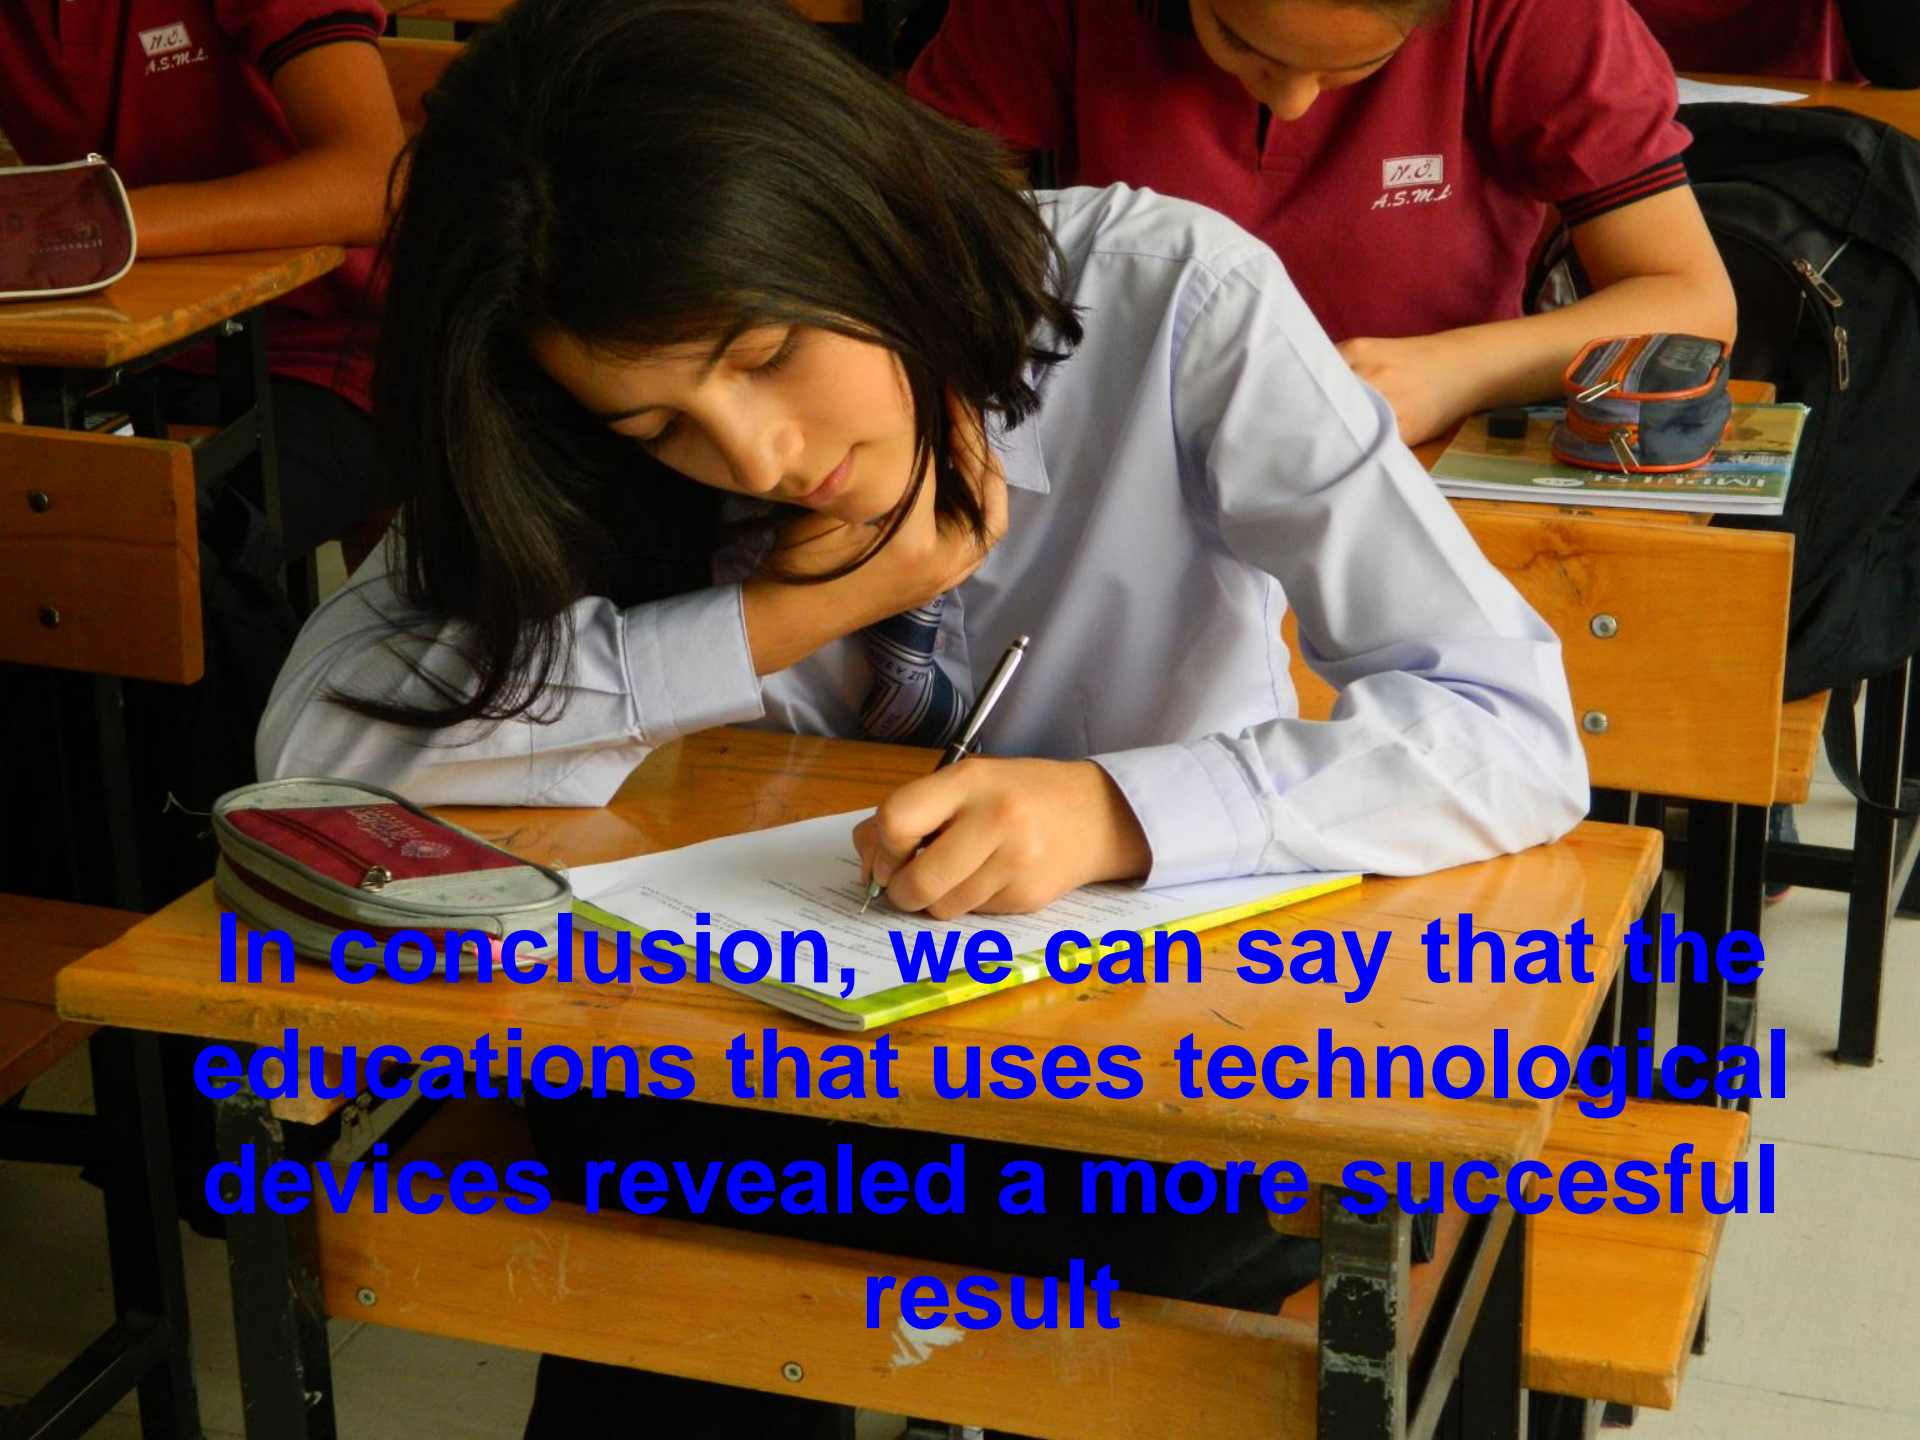

%63

**In conclusion, we can say that the educations that uses technological devices revealed a more successful result**
