

Leaves and color

Farfara Elena Minodora,
professor
„Decebal” Middle
School
Craiova, Romania

When autumns softens in honey the summer's green trees and the wind demands its tribute, it's the best time to gather waxed maple leaves.

I clean them, I press
them...,

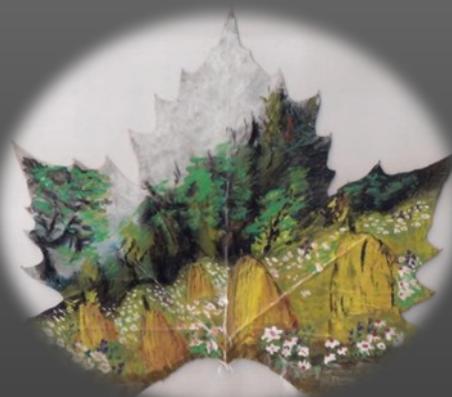

and then I make them
to remember the lost
seasons:

I give them color!

in the end,

here are some

And, in order to comfort
the longing for "home",
...I try to find them a
"frame".

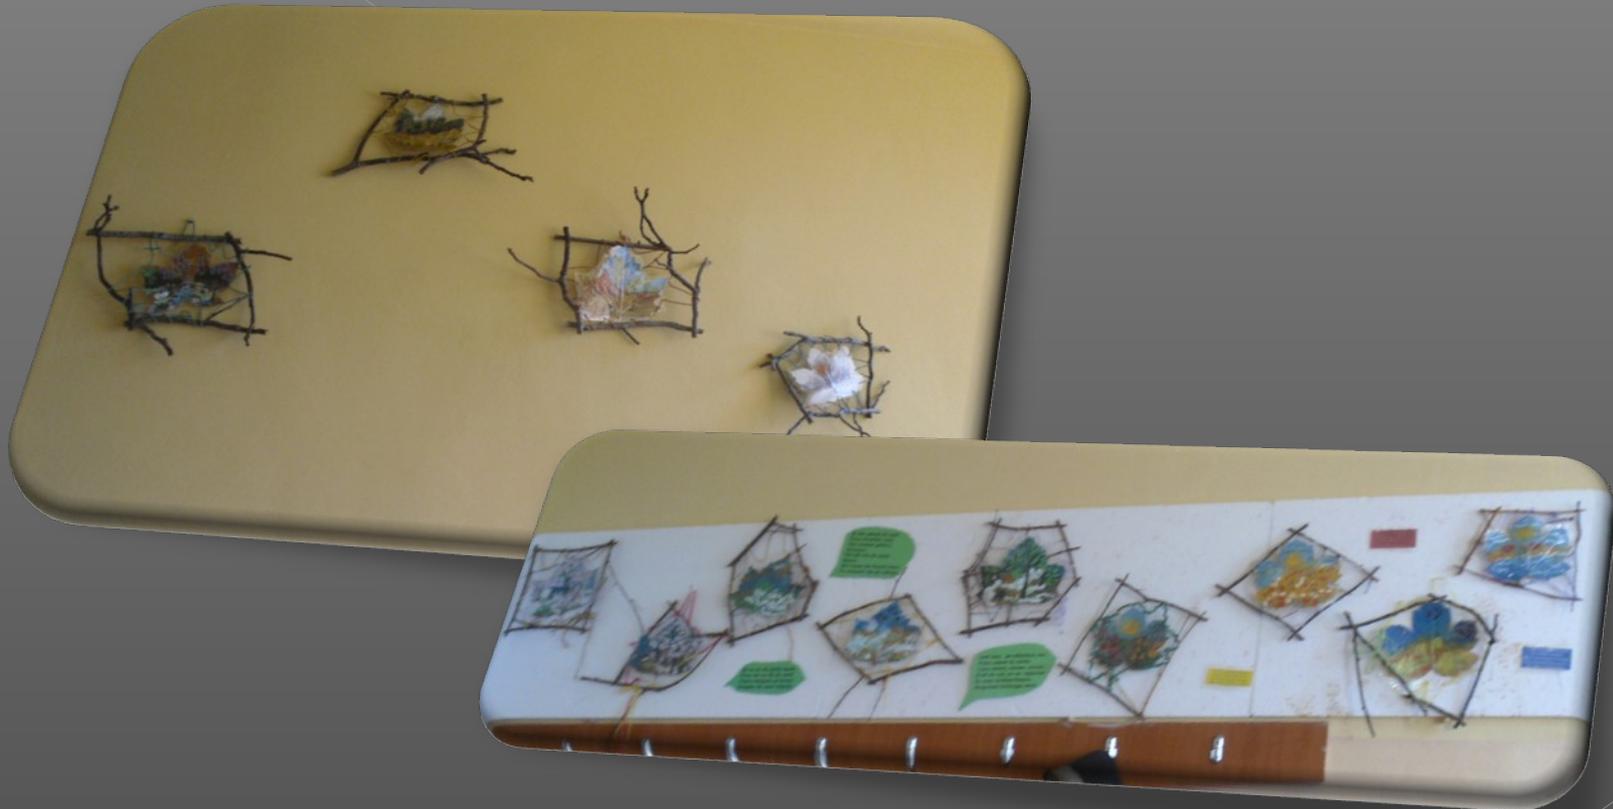

Being framed,

they smile at us...

...from the walls.

Fruits

Painted and collage ...
from natural colored leaves

Other works from the leaves

roses ...

and arrangements

Tramna cu fructe si plante

plants

For resistance,
cover them with a
thin layer of
varnish or laminate
them.

Thank you and I
advise you
NOT TO HESITATE!

Try anything
unusual!

With love,
Minodora Farfara,
